## ***Abstract***

*This study is aimed to investigate the dynamics of population growth and foreign direct investment (FDI) on urban agglomeration in Sub-Saharan Africa (SSA). It is worthy to note that SSA consists of 48 counties, and the study shall employ time-series World Bank data ranging from 1970 to 2017 in examining the study objective(s) in the SSA. In the methodology, a panel pooled ordinary least squares will be utilized in the estimation after testing for the stationarity of the annual time-series. Based on the panel regression result or estimation output, appropriate interpretations that will motivate robust policy recommendations shall be advised for effective policy making process.*

**JEL Classification Codes:** R11, R23, R30, R58, O11, O19.

**Keywords:** Population Dynamics, FDI, Urban Agglomeration, Panel Data, Sub-Saharan Africa.
